Education

First-Class Bachelor of Science (Hons) in Digital Technologies | July 2024 | Northampton University, UK

Experience

References available on request

SOFTWARE ENGINEER VOLUNTEER | ASFALTO ASCARI | APRIL 2021 – MARCH 2022 ·

Developed a custom software solution as the sole software engineer.

· Created the software based on provided designs and conversation outcomes with colleagues and project leads.
· Delivered software within specified timeframes and design specifications.
· The software enhanced the ease of use when modifying a racing simulator game to meet the software and game asset requirements for an esports event.
· Strong use of Node.js, Electron.js, Socket.io, and HTML/CSS.

SOFTWARE ENGINEER VOLUNTEER | AILURO ESPORTS | APRIL 2022 – DECEMBER 2022

· Collaborated with another software engineer to design and develop a website for an esports business.
· Developed the website within specified timeframes.
· Communicated with project partner and lead to address issues.
· Achieved a 6000% increase in user inflow, from approximately 20-100 to over 2000+ users, following an esports event and brand presentation using the new website.
· Strong use of Node.js, Vue.js, Tailwind CSS, and HTML.

WAREHOUSE OPERATIVE | KEPMSTON GARDEN CENTRE | FEBRUARY 2022 – AUGUST 2022

· Sorting inventory and transferring pallets of items from the main warehouse to smaller warehouses/greenhouses using pallet trucks.
· Potting and planting numerous plants within a specified timeframe to meet customer demands.
· Communicating with colleagues to request, and aid, when needed.
· Assisting customers with lifting heavy items into their trolleys or vehicles.

(Current) CATERING AND CUSTOMER SERVICES | KING COD | AUGUST 2024 – PRESENT

· Maintaining a clean working environment
· Serving customers and managing time effective to meet the demands of the business
· Organising stock, keeping storerooms clean and tidy and with good time

Soft Skills

· Enthusiastic about my work, excellent verbal and written communication, complex problem-solving skills and logical way of thinking, teamwork, patient, respectful, accountable, open listener, positive thinking, self-motivated, critical thinking, attention to detail, mentoring, resourcefulness, reliable, initiative.

Interests

My primary interests involve staying up to date with tech trends and developing my own software solutions within my free time, like websites and software. I am always interested in what the current "movement" is in the technology landscape and want to always keep up to date with developments. I have also built a handful of desktop computers in the past, including the one that I use every day for entertainment and work, built from parts that I learnt about by keeping up to date with technology. Additionally, participating in WorldSkills UK is a more recent interest of mine, of which I intend to partake in again next year to keep building my skillsets and confidence.
